OILFIELD TOUGH!

APOLLO POWER PACKS

GET SERIOUS WITH SIRIUS

Apollo Solar Power Packs provide power for remote applications where grid power is not readily available, or where zero emissions are desired. Sirius provides custom manufactured Apollo Solar Power Packs designed to withstand tough oil and gas applications, as well as the harsh Canadian winters. Sirius leads the way in the implementation of emission reduction and solar powered products, helping our industry meet the challenges ahead.

OPTIONS

- Skid Mounted
- Trailer Mounted
- 55 Watt to 8,000 Watt
- Gen Set Back up optional
- AC or DC output Voltages
- Zero Emission Power

APPLICATIONS INCLUDE

- Remote Power
- Temporary Power
- Zero Emission Well Sites
- SCADA
- Valve Control
- Sensor and Monitoring Applications
- Environmental Monitoring
- Security Systems
- Back Up Power
- Chemical Injection

- Sirius' custom prefabricated concrete base prevents the necessity for tethering or costly piles and on-site foundation preparation
- Drastically reduces installation cost where a foundation does not exist

SOLAR LIGHTING

INDUSTRIAL LIGHTING SYSTEMS AND KITS

Great for areas where grid power is cost prohibitive or unavailable, in addition to applications where minimal environmental impact is required such as ecologically sensitive areas.

ELIMINATE COSTS ASSOCIATED WITH CONVENTIONAL ELECTRIC LIGHTING:

- Burial survey
- Trenching and Underground cables
- Electrician
- Transformers
- Electrical metering and Power bills

APPLICATIONS INCLUDE

- Lease Lighting
- Chemical and Fuel Tank Lighting on remote sights
- Security and Theft Prevention
- Safety Requirements
- Billboards and Advertising
- Business Signs
- Parking Lots

ELIMINATES EMISSIONS ELIMINATES SMELLS FROM DEISEL GENERATORS

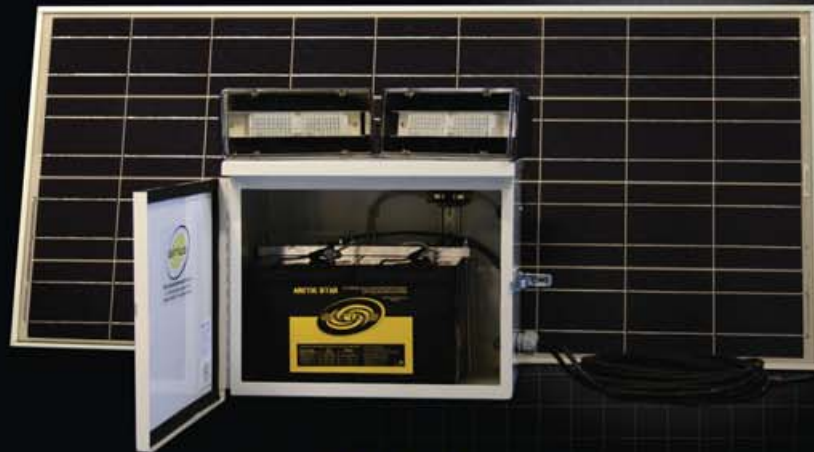

APOLLO LIGHT TRAILER

- Fast Easy Assembly
- Heavy Duty Design
- Several light head options for specific lighting needs
- Wind Generator Optional

SOLAR COMPONENTS

Sirius specializes in oil and gas applications where failure can be extremely costly to our clients. With Northern Canadian winters comes the harshest of environments for solar energy, including minimal daylight, lack of sun due to weather, snow, temperatures exceeding -40 degrees and remote access for repairs or maintenance. These are the reasons Sirius uses only the best technology for solar products. Our products must pass rigid quality control testing as well as meeting Canadian standards for both hazardous location and general purpose applications.

LIGHT KITS

BATTERIES (ALL SIZES AVAILABLE)

- The Arctic Star Solar Battery delivers 25% more energy at 20°C and 12% more energy at -25°C than other leading manufacturers
- Designed to be oilfield tough for extremely cold Canadian winter months
- AGM and Gel
- All sizes available to meet all your scada, lighting and heavy duty requirements
- Maintenance Free

SOLAR PRODUCTS

- Solar Panels (module) specializing in remote, hazardous location, technologies
- Battery Enclosures
- Solar Controllers
- Accessories
