[REDACTED]

Howdy,

I'm providing a referral for the Sirius team that has been helping us with new setups for [REDACTED] in the Permian Basin.

We have recently teamed up with Sirius to provide [REDACTED] with remote monitoring and control functions. [REDACTED] is currently using the multi-injection system for wellhead treatments (corrosion/scale products) as well as battery treatments (emulsion breaks and flowback chemicals). Remote access has also helped the team to make critical adjustments to rates for emulsion breakers and flowback chemicals and daily adjustments for corrosion scale treatments, saving valuable time.

In addition to the Sirius system, I would like to acknowledge the team that has been reliable, fast and very knowledgeable. First, I would like to acknowledge [REDACTED], these two guys have done an excellent job of explaining the system, being available for questions and constant changes to delivery days. They have also had systems put together and out in the field on short notice. Next, I would like to give praise to the technicians [REDACTED]. These gentlemen are responsive, dependable, effective, knowledgeable, and very easy to work with. I have worked with other providers in the past and the technicians you have here far exceed anything I have come across.

Based on everything we have done with Sirius I would recommend them to other chemical providers and operators.

If anyone has any questions or would like to further discuss my experience, please reach out.

Sincerely,

[REDACTED]
Area Manager
